MOST SECRET

SWISS RANDOM LETTER TRAFFIC.

Swiss Random letter traffic is encrypted by a special-type Enigma machine with special rotor mechanism being on the tyre. The first four letters of the message are the indicator and the last four letters of the message are the indicator. The fifth letter of the message is the indicator.

Amateurs & Collectors play an important role for the history of cryptography.

The Enigma history may serve as a case study.

The Enigma-Myth

Study focussed on 3 aspects

- Swiss Enigma & Nema history
- Social groups today
- Enigma in the media

Is there an Enigma-community?

contemporary witnesses

scientists

collectors

Amateur & Collectors

- Collecting objects
- Documenting
- Simulating
- Community building

Saving

- David White
at the Bletchley Park
Site

Former intelligence
service person UK

Hiding

„I do not want to have my name published. You might call me „collector x“. There are 3 reasons for my attitude: I have a few extremely rare pieces, not just cipher machines. There are people who would like to know that. And I feel that CIA & NSA are still following up on that and think these machines belong to them. They might show up one day and take them away from me“

“

.

Refurbish & Reconstruct

„I like the idea of having objects that nobody else has. These are parts that are often destroyed. Sometimes I get the feeling that there are persons who do not like that and are quite happy I am not writing a book about it“

Günter Hütter, Austria

Documentation

The Fialka
documentation made
by Paul Reuvers &
group

Re-Enacting Enigma

- Bletchley Park UK

Re-enacting Enigma
on weekends

An Enigma machine is the central focus, resting on a wooden table outdoors. The machine is a complex mechanical device with a keyboard and a rotor assembly. The background shows a grassy area and some trees, suggesting an outdoor setting. The text is overlaid on the image in a large, bold, yellow-green font with a black outline.

Events Calendar

Through Living History displays and simulated combat tactical events our members explore what it was like to be a German soldier during World War II

[More](#)

Prospective Members

Grossdeutschland is by far one of the oldest World War II reenactment units with 30 years of experience

[More](#)

Our Unit Mission

As the leading World War II German Living History Reenactment Unit, our mission is to research and present the common German soldier of World War II

[More](#)

Nonprofit Affiliation

The World War Two Historical Preservation Group (W2HPG) is a nonprofit corporation

[More](#)

The equipment of Grossdeutschland-USA

Take a look at our vehicles, weapons and other equipment we use for our impression. **(Under construction)**

The Grossdeutschland Division Treffen

Once a year we are able to travel to Germany to meet the men who fought for their country. Here we have an opportunity to discuss old times and learn new stories never before told by the surviving members of this Famous World War II unit.

Unit Vendors,

The Following vendors are approved sources for equipment based on quality and past experience.

(Under construction)

Links and Information for Further Study

Additional information regarding Grossdeutschland as well as other reenactment units can be found by using the links provided on this page.

[More](#)

Event Photos

We are pleased to present some of our most favorite photographs taken at events over this past Year.

[More](#)

Unit History

As a fighting unit Grossdeutschland was formed in 1939. The core of this four battalion infantry regiment came from the "Wachregiment Berlin".

[More](#)

Period Photos

The following original wartime photographs and studio portraits depict men of the Grossdeutschland Division.

(Under construction)

GD Jugend Soldaten Program

Because the minimum age for firing a weapon is 18 years old, many young people interested in participating in World War II reenacting are not able to do so.

Contacting GD

Summary

- Variety of groups, variety of motivation – but all focus in on the one object: Enigma
- Variety of information channels: Formal and informal..
- Boundary objects

Conclusions

- Collectors & museums: Museum have formal rules. Collectors informal rules.
- Museums: Often can neither operate nor restaurate machines
- Collectors: Sometimes operate and restaurate machines

Conclusions 3

- Museum: Long duration
- Collectors: Transitory

Outlook

How to save, collect, restore, display and teach the present and future with all devices being black boxes with digital tech?

Dominik Landwehr, Switzerland
